

Jenzabar Mobile

Jenzabar for today's mobile devices

We're mobile, and we need to stay connected with our school while we're on-the-go. Modern smart phones offer a powerful, rich, and engaging user experience like never before. Add the recent explosion of tablet devices, and now more than ever we're turning to mobile technology for everything that's important to us and our students.

Jenzabar® Mobile supplies you, your faculty and students with the critical academic and administrative information you need right at your fingertips. With Jenzabar Mobile, your constituents can easily stay engaged and connected, everywhere they go.

On-the-go

Jenzabar Mobile extends the reach of your Jenzabar solutions beyond stationary desktop browsers, into the hands of your constituents. Mobile users can access course news feeds, coursework, schedules, handouts, grades, attendance, and other critical information with just a few taps on their smart phones or tablets. Announcements, calendars, campus directory, blogs and more are easily accessed on the go, so everyone on campus can get the important content they need to succeed, any time and any place.

More than Just Another Mobile App

Jenzabar Mobile brings Jenzabar solutions' functions to mobile devices in a friendly, easy-to-use, and engaging environment. With Jenzabar Mobile, you can provide the same rich user experience as a native app without the complexity of distributing and updating software via an "app store." And because Jenzabar Mobile uses the same JICS database and runs as a website along with the JICS website (and on the same server), it's easier to maintain and modify than a typical mobile app.

Jenzabar Mobile's intuitive interface also leverages the usage patterns of today's mobile user, combining the content students want with the functionality they expect, in the format they are used to.

Supports Popular Mobile Environments

Devices currently supported include: Apple® iOS devices (iPhone®, iPod Touch® and iPad®), Google Android™ devices, and BlackBerry® v6.0 cell phones. A cellular network or Wi-Fi Internet connection is required.
