

# Why choose to study in China universities?

With the growing strength of China and the increasing number of students studying in China, "[Study in China](#)" is becoming a new brand of studying abroad.

According to the statistics released on the website of the Ministry of education, in 2018, 492,185 foreign students of various types from 196 countries and regions studied in 1,004 colleges and universities in 31 provinces (autonomous regions and municipalities), and China continues to maintain its position as Asia's largest destination for overseas students.

At the same time, the professional structure of international students is constantly optimized. The number of students studying engineering, management, science, art, and agriculture has increased significantly, with a year-on-year increase of more than 20%, which shows that the professional education of natural sciences in China is becoming more and more attractive.
